Management and Photo Finish Technology

Camel Races : EIEV Timing system
operations

Preparations : Last final touches for the
upcoming launch of the season

BUDHEEB ENDURANCE VILLAGE : HIGH TECHNOLOGY FOR BETTER MANAGEMENT

EIEV provided crucial technological enhancements to streamline the Budheeb operations, ensuring efficiency in execution, thanks to the Timing System Technology.

This included deploying advanced solutions to manage activities smoothly during the event, and played a vital role in bridging coordination between event organizers, participants, and stakeholders to ensure seamless collaboration.

BUDHEEB ENDURANCE VILLAGE QUALIFIERS

EIEV TIMING SYSTEM AT RACE CAMEL TRACK

CAMEL RACES

EIEV introduced cutting-edge technology to enhance race monitoring, ensuring accurate tracking and timing of participants, which added a layer of precision and transparency to the event.

By integrating interactive tools and displays, EIEV helped elevate the audience's experience, making the races more engaging and accessible for both local and international fans.

HERE'S HOW EIEV IS PREPARING FOR THE UPCOMING SEASON

The Emirates International Endurance Village has begun preparations for the upcoming season. With careful planning and a commitment to excellence, the village is ready to host riders, teams, and enthusiasts from around the world, solidifying its reputation as a world riders destination. Here's how :

- Deployment of advanced tracking and monitoring systems for accurate performance data and real-time updates.
- Streamlined planning of races with necessary infrastructure and amenities.
- Emphasis on eco-friendly practices, including renewable energy and sustainable waste management.
- Introduction of innovative training tools and pre-race facilities for participants.
- Building strategic alliances with sponsors and partners to elevate event prestige.
